DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9, drawn to a blasting system, classified in class 102, subclass 200.
- II. Claims 10-24, drawn to method of preparing a detonator and discharging charges, classified in class 102, subclass 200.
- III. Claims 25-28, drawn to a program product, classified in class 361, subclass 247.

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case invention II, the method comprising the steps of moving a programmable unit, determining blasting information and downloading the information can be done by hand. In addition, before the advent of modern technology the method steps instant invention was performed by hand.

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as program product for use in a pyrotechnic display. See MPEP § 806.05(d).

Art Unit: 3644

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
